## (54) CACHE INFORMATION OPERATION AND MANAGING METHOD USING BIND INFORMATION

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To speedily reflect alterations of original offer information and reference information in cache information on a node by altering or deleting bind information on a cache that a client AP common use cache information management part having received information holds by itself.

**SOLUTION:** A client application program(AP) presenting at a terminal, which a user uses, informs a client AP common use cache information management part at a report destination that bind information at a reference destination is altered or deleted from report management parts present on the same nodes 22 to 24 with an information server that the client AP has accessed while selecting report destinations if the information at the reference destination is altered or deleted once the bind information cached on the nodes 22 to 24 where a terminal 21 and the bind information server operate. Further, the client AP common use cache information management part alters or deletes the bind information on the cache that the management part itself holds.
